PART LIST

ASSEMBLING

1. Identify the longer bar and the shorter bar
2. Ensure 8 bolts of both types in Silver to fix bracket on bars and the Black to mount the brackets to roof rails
3. Ensure the brackets on the right position
4. Taper side crossbars faces backward, arrow points to front.

INSTALLATION TIPS

1. Longer bar at the front
2. Short Bar at the back
3. Keep right side fixing screws TBM6S loose until brackets mounted on the roof rails with screw TRN6B

SAFETY NOTES

- Never Exceed the manufacture's roof rack load limit
- Ensure load is evenly distributed between the two crossbars and that it is as low as possible refer to specification.
- Confirm tightness every 1000 km, periodically check that the load is secure and crossbars are securely tightened
- Ensure that crossbar is installed in correct orientation
- Ensure that the crossbars are fully installation to the side supports with no gaps.
